COACHING DEVELOPMENT

A big factor for growth of both total numbers of athletes and high performance athletes is developing coaches.

We have the NCCP courses that get people started, but from there everyone's sort of on their own to develop their skills.

- In this season we want to develop a coach mentorship program, which sets newer coaches up with experienced coaches to learn from
- We're using the discussions from last year's High Performance Coaching Committee to plan how the program will work
- We're also applying for the Coaches Association of Ontario Apprenticeship Program grant to help fund a training camp for these mentor and apprentice coaches
- The training camp will take place in the fall, before the Senior Ontario Championships, and will provide an intensive learning environment for the coaches involved
